New packaging Q2 2012

Product description

Lawn feed by controlled release technology for pre-winter application.

Product advantages

1. Ideal general purpose controlled released fertilizer.
2. Controlled release nitrogen only released in conditions favourable to turf grass growth therefore helping to pre-stress condition the plant.
3. High potassium content strengthens cell walls and aids water regulation in plant.
4. Nutrients are released over 4-5 months to ensure lawn is in best shape following the winter.

Directions for use

- Apply to dry foliage.
- Watering-in after application aids dispersion and gives a quicker initial effect.
- Avoid applications during frosty or drought conditions.
- Applications should be made after aeration programmes such as hollow tining, slitting and/or scarification to prevent granules damage.

Storage

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0 °C and 40 °C.

Health & Safety

A Material Safety Data Sheet is available on request.
